Founder: Prof. Dr. S. B. Mujumdar, M. Sc., Ph. D. (Awarded Padma Bhushan and Padma Shri by President of India)

Practical No.: 12

Aim –

Implement the jQuery library for DOM manipulation, event handling, animations, and LocalStorage integration to develop an interactive Task Manager application supporting persistent task creation, status toggling, and deletion. Implement Case Study 2: Beats & Beyond Online Music Concert Registration system with tier-based ticket selection, dynamic pricing updates, promo discounts, and real-time validation, along with Discover Nagpur City showcase featuring periodic DOM style animation (blinking effect) and responsive local attraction exploration.

Software/Tools Required –

VSCode
Chrome Browser
HTML5
CSS3
JavaScript (ES6)
jQuery Library (v3.7.1)

Experiment Program Code – Interactive Task Manager (jQuery & LocalStorage)

```

Output –

Conclusion –

In this experiment, the jQuery framework and HTML5 Web Storage (localStorage) were effectively used to create interactive and stateful web applications. The Interactive Task Manager demonstrated simplified DOM event handling, dynamic HTML creation, item completion toggling, and seamless persistence across page reloads. Case Study 2 (Beats & Beyond) showcased advanced multi-tier ticket booking with real-time summary calculation, discount coupon handling, and robust form validation. Additionally, the Discover Nagpur module illustrated JavaScript setInterval animation effects, class toggling, and responsive card layouts. All implementations were tested and executed successfully.
